

Ahmad KRD

Sr. Full Stack Developer

ahmadabbas.krd@gmail.com | India | +91 8160721519

Profile

Full Stack Developer with 4+ years of experience designing and building scalable web and mobile applications. Specialized in the **MERN stack (MongoDB, Express.js, React.js, Node.js)** and **React Native** for developing end-to-end solutions with high performance and maintainability. Proficient in modern frontend frameworks, backend APIs, and database design, with strong expertise in **React.js, Node.js, Express.js, and MongoDB**, complemented by skills in Angular, Laravel, Python, and Tailwind CSS. Adept at **RESTful API integration, cloud deployment, and performance optimization**. Recognized for excellent problem-solving, team collaboration, and client communication, with a passion for **innovation and continuous learning**.

Skills

Languages:

C, PHP, JavaScript, Html/Css

DevOps & Tools:

Git, WHMCS, Virtuozzo, DigitalOcean, Cloud Config

Frontend:

React.js, Tailwind CSS, AngularJS, React Native, HTML/CSS, Bootstrap

Soft Skills:

Team Leadership, Client Communication, R&D, Documentation

Backend:

Node.js, Express.js, Laravel, Next.js, MySQL, MongoDB, Supabase, REST API, MVC architecture

Professional Experience

Sr. Full-Stack Engineer (Product & Platform Development), Qubixcode- 05/2025 – Present - Ahmedabad

- Develop Micro SaaS from MVP to actual applications with full-stack architecture.
- Manage VPS servers, deployments, monitoring, and log management
- Integrate AI features, secure authentication, and dynamic dashboards
- Improve SEO performance using Next.js best practices + Google Search Console
- Deliver complete solutions — development, deployment, optimization & maintenance

Software Engineer, STP Web Hosting- 02/2024 – 04/2025 - Ahmedabad

- Developed and maintained an AI-powered Chrome extension for Chatra using **Vanilla JS, Python, Tailwind CSS and OpenAI Model**, enhancing real-time user engagement and automated support replies.
- Created technical documentation for hosting setups on AccuWeb.cloud, covering deployments in **Node.js, Java, React,** and Angular environments.
- Worked extensively with WHMCS and Virtuozzo using Laravel and Core PHP for virtual server provisioning, automated billing, and support system integration.
- Contributed to client-facing products in insurance and real estate lead management domains using **React, Tailwind CSS, and Node.js** for scalable and responsive web applications.

Full Stack Developer, *Alteza tel-* 9/2022 – 01/2024 - Ahmedabad

- Redesigned the company's E-commerce platform, resulting in a 70–80% increase in customer retention and improved checkout experience.
- Developed a custom Rating & Review module using Angular on the frontend and Laravel APIs on the backend.
- Optimized performance-critical code and resolved legacy bugs affecting responsiveness and security.
- Led a team of 3–4 developers and coordinated directly with clients to gather requirements and deliver modules on tight deadlines.
- Built an end-to-end POS (Point of Sale) and inventory management system, handling everything from user dashboards to billing and analytics.
- Designed and implemented RESTful APIs using MVC architecture to ensure modularity and clean code separation.
- Managed backend operations independently and handled client communications for ongoing feature upgrades support.

Projects

Scanzen – AI-powered SaaS Platform: Micro-SaaS Product

Next.js, Node.js, MongoDB, Redis, OpenAI API, Nginx, Cloudflare | Live: <https://scanzen.app>

- Built a **production-ready SaaS platform** for AI-driven product intelligence and data analysis
- Designed **scalable REST APIs** handling high-volume requests with optimized MongoDB queries
- Implemented **SSR, caching, and performance optimizations** in Next.js for faster page loads
- Integrated AI pipelines for automated insights, summaries, and intelligent content extraction
- Deployed on VPS using **Nginx + PM2**, with **Cloudflare CDN and caching** for global performance

Photofy – AI-based Image Processing SaaS: Micro-SaaS Product

Next.js, Node.js, MongoDB, Cloudinary, AI APIs | Live: <https://photofy.app>

- Developed a **full-stack SaaS application** for AI-powered image enhancement and processing
- Built **API-driven backend services** for image upload, transformation, and optimization
- Implemented secure authentication and scalable usage-based architecture
- Optimized media delivery using **CDN, lazy loading, and caching strategies**
- Designed backend services to support **concurrent users and large media workloads**

AI Auto-Suggestion Browser Extension

JavaScript, Python, ChatGPT (Fine-tuned)

- Developed a browser extension integrating AI-powered auto-suggestions for internal office applications.
- Fine-tuned GPT models to provide contextual recommendations, reducing manual work by **5–6 business hours per employee**.
- Automated repetitive workflows improve productivity across multiple teams.

Alteza Tele-Pharmacy Platform

React, Node.js, MongoDB

- Redesigned and enhanced a tele-pharmacy platform (similar to 1mg/PharmEasy) with improved UI/UX and additional features.
- Implemented MongoDB-based product catalogue and order management systems.
- Increased platform sales by **20%** through optimized user experience and streamlined checkout.

Cuvva Insurance Platform

Svelte, React, Node.js, MongoDB

- Contributed to a short-term insurance platform by developing scalable customer and admin dashboards.
- Designed MongoDB schemas for insurance policies, users, and claims management.
- Implemented role-based access control and policy tracking to improve admin efficiency.

Restaurant Billing System (POS)

React, Laravel API, MySQL

- Designed and optimized a relational database schema for a POS billing system covering orders, inventory, and user management.
- Improved query performance by **~20%** using indexing and query optimization for **~10k** users.
- Built secure APIs with transactional support to ensure data consistency.

Jackpot Aruba – Online Lottery Platform

Next.js, Stripe Payment Gateway

- Developed an online lottery platform supporting Pick 3, Pick 4, and Pick 5 games.
- Implemented secure online ticket purchasing using Stripe.
- Delivered a responsive, user-friendly interface for seamless gameplay and payments.

Fillora – One-Form Platform: Micro-SaaS Product

Next.js / React, Node.js | Live URL:- <https://fillora.app/>

- Built **Fillora**, a one-form solution enabling businesses to collect, manage, and analyze form submissions efficiently.
- Designed dynamic form handling with validation and optimized data storage.
- Focused on performance, usability, and scalability for real-world business use cases.

TryFitNow.app – Fitness Platform: Micro-SaaS Product

React / Next.js, Node.js | Live URL:- <https://tryfitnow.app/>

- Developed a fitness-focused web application offering user engagement through personalized features.
- Implemented responsive UI and optimized performance for mobile and desktop users.

- Enhanced user experience through clean design and smooth navigation.

Cardlyx – Digital Card Platform: Micro-SaaS Product

React / Next.js, Node.js | Live URL:- <https://cardlyx.com/>

- Built **Cardlyx**, a digital card solution for creating and managing smart business or greeting cards.
- Implemented secure data handling and dynamic card generation.
- Designed a modern, intuitive interface to improve user adoption and engagement

Education

MCA – Master of Computer Applications, *Silver Oak University*- 2022 - 2024

BCA – Bachelor of Computer & Application, *IT Sheliya (HNGU University)* - 2021
